-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1) Claims 1-11 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Banning (5,851,356). Banning discloses apparatus and method for laterally sealing a drainage gap of a twin wire paper machine. Figure 1 is a partial cross-section through a twin-wire former (in the region of the edge) in a view transverse to the direction of the travel of the web. As shown in Figure 1, via sealing connection 10 and pre-chamber 9, sealing water flows through the gap 11 between upper wire S2 and sealing spacer 1 above deckle or spacer 8, in the direction of pulp slurry 17 thus creating a hydrodynamic sealing of the gap between the

wire and the deckle. The water flow through the gap 11 lubricates slurry 17. The amount of water is so determined that there is no penetration of slurry into gap 11 (col. 3, line 7 to col. 4, line 12, and Figures 1-3). Banning discloses the invention, or in the least the method steps and apparatus structural differences are minor and would have been obvious to a skilled practitioner over the cited prior art.

### ***Conclusion***
